INDEX TO VOLUME 7, 1950

Subjects dealt with under various headings in the JOURNAL are set out both in the main Index and under their respective headings—for example, 'Abstracts,' 'Book Reviews.' Names of authors of original articles are included in the Index. There is a separate Index to Abstracts. Names of authors of articles abstracted are separately listed.

		Pages			Pages
No. 1.	January	1–64	No. 3.	July	105–160
No. 2.	April	65–104	No. 4.	October	161–222

A

Acclimatization of Bantu mineworkers to hot humid conditions (J. S. WEINER), 17
Aluminium, effect of, on inhaled quartz (E. J. KING *et al.*), 27
ANDERSON, A. : Possible long term effects of exposure to sulphur dioxide, 82
Association of Industrial Medical Officers, Proceedings, 61, 90, 148, 198

B

Bantu mineworkers, acclimatization of, to hot humid conditions (J. S. WEINER), 17
BEDFORD, T. (and C. G. WARNER): Size and nature of dust particles found in lung tissue, 187
Benzene poisoning, erythro-leukæmic myelosis in (B. GALAVOTTI and F. M. TROISI), 79
Beryllium granulomata in lungs of rats (T. A. L. DAVIES and H. E. HARDING), 70
——— oxide, effects of, on animal tissues (A. POLICARD), 117
BILLINGTON, J. G., on lighting conditions in the factory, 149
Book Reviews :
Guide to the diagnosis of occupational diseases (Ontario State Government), 88
Handbook for industrial nurses, 2nd ed., 1949 (M. WEST), 88
Industrial hygiene and toxicology, vol. II, 1949 (F. A. PATTY), 87
———nutrition, 1950 (M. PYKE), 146
———toxicology, 1949 (L. T. FAIRHALL), 146
Infection and sepsis in industrial wounds of the hand (M.R.C. Spec. Rep. Ser. 266), 1949 (R. E. O. WILLIAMS and A. A. MILES), 87
Lead Hygiene Conference, 1948, proceedings (Lead Industries Association), 196
Modern practice in dermatology, 1950 (G. B. MITCHELL-HEGGS, *ed.*), 197
Occupational eye diseases and injuries, 1949 (J. MINTON), 46
Principles of medical statistics, 5th ed., 1950 (A. B. HILL), 197
Report for the year 1949 of Central Mining—Rand mines group health department (A. J. ORENSTEIN), 197
Rheumatic diseases, 1950 (G. D. KERSLEY), 147
This is the law : National Insurance, 2nd ed., 1949 (J. GAZDAR) 46
Tuberculosis in the Commonwealth, 1949 (National Association for the Prevention of Tuberculosis), 89
Vanadium pentoxide dust ; a clinical and experimental investigation, 1950 (S. GÖSTA-SJÖBERG), 195
Works lavatories, 1949 (Industrial Welfare Society Inc), 46
BRIDGE, JOHN C., Memorial lecture, 105
Briquetting works in South Wales, dust conditions at (H. H. WATSON), 73
BUCKELL, MONAMY : Toxicity of methyl iodide, 122
——— (and J. D. RICHARDSON) : Significance of Heinz bodies in the erythrocyte, 131

C

Cancer, skin, from mineral oil in engineering (C. N. D. CRUICKSHANK and J. R. SQUIRE), 1
Canteen, industrial, 150
Canteens of the London Transport Executive, 151
Carborundum, *in vivo* solubility of, 12
Cement, *in vivo* solubility of, 12
Coal-miners, periodic medical examination of, 112
Cobalt metal, toxicology of (H. E. HARDING), 76
Cooperage, conditions in, causing lead encephalopathy, 183
CRUICKSHANK, C. N. D. (and J. R. SQUIRE) : Skin cancer from mineral oil in engineering, 1
Cyanide poisoning, successful treatment of two cases of (A. Ll. POTTER), 125

D

DAVIES, T. A. LLOYD (and H. E. HARDING) : Beryllium granulomata in lungs of rats, 70
Dermatitis, occupational, 198
——— ——— differential diagnosis of, 199
——— ——— prevention of, 199
Disabled, resettlement of, 107
Doctor and workman (JOHN C. BRIDGE memorial lecture, 1950), 105
Dust conditions at briquetting works in South Wales (H. H. WATSON), 73
—— particles in lung tissue, size and nature of (T. BEDFORD and C. G. WARNER), 187
—— suppression, engineering aspects of, 61
Dusts, siliceous, fate of, in the body (P. F. HOLT), 12

E

Education and function of industrial health team (R. E. LANE), 161
Engineering, skin cancer in, from mineral oil (C. N. D. CRUICKSHANK and J. R. SQUIRE), 1
Erythro-leukæmic myelosis in benzene poisoning (B. GALAVOTTI and F. M. TROISI), 79
Ethylene glycol vapour, chronic intoxication by (F. M. TROISI), 65
Examination, medical, periodic, 108
Eye, effects of radiant energy on, 148

F

FLETCHER, C. M., on pneumoconiosis in South Wales, 62
Food-handler, education of, 150
Food handling, hygienic, 151
FRESHWATER, D. G., on furunculosis and superficial skin sepsis, 90
FUGAŠ, M., *see* VOUK, V. B., FUGAŠ, M., and TOPOLNIK, Z.
Furunculosis and superficial skin sepsis, 90

G

GALAVOTTI, B. (and F. M. TROISI) : Erythro-leukæmic myelosis in benzene poisoning, 79
Gastro-intestinal conditions, radiological appearances of, 148
GOLDBLATT, M. W., on occupational dermatitis, 198
GOUGH, J., on pathology of pneumoconiosis, 62
Granite, effects of, on lungs of rats (E. S. KING, S. C. RAY, and C. V. HARRISON), 37
Graphite pneumoconiosis (L. PARMEGGIANI), 42

H

HARDING, H. E. : Notes on the toxicology of cobalt metal, 76
———, *see* DAVIES, T. A. LLOYD, and HARDING, H. E.
HARRIS, C. G., *see* SUTHERLAND, I., HARRIS, C. G., and SMITHERS, A.
HARRISON, C. V., *see* KING, E. J. *et al.*, KING, E. J., RAY, S. C., and HARRISON, C. V.
HAY, W. : Lead encephalopathy in a cooperage, 177

Heat and humidity, acclimatization of Bantu mineworkers to, 17
Heinz bodies, significance of, in the erythrocyte (M. BUCKELL and J. D. RICHARDSON), 131
HOLT, P. F.: Fate of siliceous dusts in the body, 12
HORNER, S., on prevention of occupational skin conditions, 199
HUDSON, A., on engineering aspects of dust suppression, 61
Humidity and heat, acclimatization of Bantu mineworkers to (J. S. WEINER), 17
Hygiene engineer, industrial, training of, 166

I

Idria, mercury mine at, conditions in the (V. B. VOUK, M. FUGAŠ, and Z. TOPOLNIK), 168
Industrial health team, education and function of (R. E. LANE), 161
——— medical officer, training of, 163
Infection, studies of, by M.R.C. Industrial Medicine Research Unit, 203
Intervertebral disc, prolapsed, 200
Intoxication, chronic, by ethylene glycol vapour (F. M. TROISI), 65

J

JOHNSON, —., on the industrial canteen, 150

K

KING, E. J., *et al.*: Effect of aluminium on inhaled quartz, 27
——— (and S. C. RAY, and C. V. HARRISON): Effects of granite on lungs of rats, 37

L

LANE, R. E.: Education and function of the industrial health team, 161
Lead encephalopathy in a cooperage (W. HAY), 177
LERNER, A., on hygienic food handling, 151
Lighting in the factory, 149
Lung tissue, size and nature of dust particles found in, 187
Lungs of rats, beryllium granulomata in, 70
—— — —— effects of granite on, 37

M

MACKENNA, R. M. B., on differential diagnosis of occupational dermatitis, 199
MATHERS, R. G.: Rehabilitation of the tuberculous, 153
Medical officer, industrial, training of, 163
MEIKLEJOHN, A.: Doctor and workman (John C. Bridge memorial lecture, 1950), 105
Mercury mine at Idria, environmental conditions in (V. B. VOUK, M. FUGAŠ, and Z. TOPOLNIK), 168
Methyl iodide, toxicity of (M. BUCKELL), 122
Mineworkers, Bantu, acclimatization of, to hot humid conditions, 17
MINTON, J., on radiant energy and its effects on the eye, 148
Morbidity, occupational, studies in; part III (I. SUTHERLAND, C. G. HARRIS, and A. SMITHERS), 140

N

Nurses, industrial, training of, 165

O

Oil, mineral, in engineering, skin cancer from, 1

P

PARMEGGIANI, L.: Graphite pneumoconiosis, 42
PLEWES, L. W., on the Vauxhall Motor Company's rehabilitation centre, 200
Pneumoconiosis, 106
——— in South Wales, 62
———, graphite (L. PARMEGGIANI), 42
———, pathology of, 62
Poisoning, mercury, 168
POLICARD, A.: Histological studies of effects of beryllium oxide (glucine) on animal tissues, 117
POTTER, A. LL.: Successful treatment of two cases of cyanide poisoning, 125
Proceedings of the Association of Industrial Medical Officers, 61, 90, 148, 198
PYGOTT, F., on radiological appearances of some gastro-intestinal conditions, 148

Q

Quartz, inhaled, effect of aluminium on, 27
——— *in vivo* solubility of, 12

R

Radiant energy, effects of, on the eye, 148
Radiation, clinical effects of, 201
RAY, S. C., *see* KING, E. J. *et al.*, KING, E. J., RAY, S. C., and HARRISON, C. V.
Rehabilitation centre in the Vauxhall Motor Company's works at Luton, 200
RICHARDSON, J. D., *see* BUCKELL, MONAMY, and RICHARDSON, J. D.

S

Sand, moulding, *in vivo* solubility of, 12
SAPPINGTON, CLARENCE OLDS, 1889–1949, obit., 145
Siliceous dusts, fate of, in the body (P. F. HOLT), 12
Silicosis, size and nature of dust particles found in lung tissue in case of, 187
Skin cancer from mineral oil in engineering (C. N. D. CRUICKSHANK and J. R. SQUIRE), 1
SMITHERS, A., *see* SUTHERLAND, I., HARRIS, C. G., and SMITHERS, A.
SQUIRE, J. R., *see* CRUICKSHANK, C. N. D., and SQUIRE, J. R.
Sulphur dioxide, exposure to, possible long term effects of (A. ANDERSON), 82
SUTHERLAND, I. (and C. G. HARRIS, and A. SMITHERS): Studies in occupational morbidity; part III, 140
SUTHERLAND, R., on education of the food-handler, 150

T

TOPOLNIK, Z., *see* VOUK, V. B., FUGAŠ, M., and TOPOLNIK, Z.
Toxicology, industrial, 106
——— of cobalt metal (H. E. HARDING), 76
TROISI, F. M.: Chronic intoxication by ethylene glycol vapour, 65
——— *see* GALAVOTTI, B., and TROISI, F. M.
Tuberculous, rehabilitation of, 153

V

VOUK, V. B. (and M. FUGAŠ, and Z. TOPOLNIK): Environmental conditions in the mercury mine of Idria, 168

W

WARNER, C. G., *see* BEDFORD, T., and WARNER, C. G.
WATSON, H. H.: Dust conditions at briquetting works in South Wales, 73
WEINER, J. S.: Acclimatization of Bantu mineworkers to hot humid conditions, 17
WINTERTON, B., on the canteens of the London Transport Executive, 151
WRIGHT, B. M., *see* KING, E. J. *et al.*

INDEX TO ABSTRACTS

A

Acetone toxicity, experimental studies, 50
Acrylonitrile and methacrylonitrile, comparative toxicity of, 50
Aerosols, aluminium powder and NaCl, effect of, on pulmonary deposition of silica dust, 99
————, bronchodynamic, use of, in study of respiratory function in silicosis, 211
—— —, saline, effect of, on atmospheric dust, 56
Agranulocytosis, toxic, treatment of, 98
Air, bactericidal action of triethylene glycol vapour in, 215
—— in underground trains, bacterial contamination of, 214
Air-borne particulates, penetration of, through the human nose, 209
Alkyl mercury compound poisoning, 50, 95
Altitudes, high, simulated, fatalities from exposure to, in decompression chambers, 214
————, simulated, oxygen transport, circulation and respiration at, 52
Alumina abrasives, fume exposure in manufacture of, 54
———— ————, pulmonary changes in makers of, 54, 55
Amines, aromatic, bladder lesions due to, 96
Ammonia, physiological response of man to, in low concentrations, 53
Anæmia, acute hæmolytic, due to naphthalene poisoning, 96
Anthracosilicosis, electrocardiographic studies in, 99
Arsine poisoning from scaling with acid, 48
—— ———— in industry, 208
Atmospheric pressure, changes in the ear due to changes of, 53
———— ————, raised, undetected bone lesions in workers under, 53

B

B. proteus vulgaris, infection by, treated with dibromopropamidine, 103
Bacteria on bank notes, 60
Bagasse, pathogenicity of, 56
BAL, effect of, on experimental lead, tungsten, vanadium, uranium, copper and copper-arsenic poisoning, 94
—— in industrial diseases, 157
Bank notes, bacteria on, 60
Bauxite-fume pneumoconiosis, morphology of, 55
Bed rest, effects of, on cardiovascular function and work performance, 209
Benzene, agranulocytosis due to, 98
Benzol poisoning in children, 206
Berylliosis, non-occupational, 159
————, pulmonary, case of, 210
Beryllium, exposure to, diffuse pulmonary granulomatosis following, 211
————, health hazards to workers in, 54
———— phosphors, cutaneous granuloma from contamination with, 101
———— poisoning, experimental, 157
Beta ray burns of human skin, 101
Bismuth therapy, oral, in dermatology, 102
Bladder lesions due to aromatic amines, 96
Blood changes in luminizers using radioactive material, 51
—— pressure, resting pulse rate, and physical fitness, 210
Boils; an epidemiological survey, 215
Bone lesions, undetected, in workers under raised atmospheric pressure, 53
Burn, dorsal, of hand, treatment of, 58
Burns, eschar in, elimination of, by pyruvic acid, 97
——, fibrin-coagulation method of treating, 102

C

Cancer of the lung, conditions for development of, 212
" Carbitol solvent," external use of, 102
Carbon dioxide, reaction to, in pneumokoniosis of coalminers, 210
———— disulfide, absorption and elimination of, in man, 50
———— ———— poisoning, theory and pathology of, 51
———— monoxide poisoning, ophthalmoneurologic changes in, 208
Carcinoma, bronchiogenic, oil particles in the lung and, 212
Climb, high rate of, effects of, on human organism, 209
Coal-tar dyes as colouring for food-stuffs, 160
Cobalt, hæmatopoietic action of, 47
Cold, physiological reactions to, and their effects on acclimatization to heat, 52
Congo, Belgian, mosquito control in, with " Gammexane ", 43
Contamination, bacterial, of air in underground trains, 214

D

DDT spraying for malaria control in Trinidad, 48
Decompression chambers, simulated high altitudes in, fatalities from exposure to, 214
Dentists, contact dermatitis in, due to procaine, 103
Dermatitis, acute, and pneumonitis in beryllium workers, 57
————, glass-wool, 57
Dermatological hazards in the leather industry, 57
Detonator factory, fatalities in a, 50
Diatomaceous earth, pneumoconiosis from, 56
Diazomethane poisoning, 157
Dibromopropamidine (M. & B. 1270), use of for surface infections, 103
Disability, a new method of evaluating, in silicosis, etc., 158
Disinfection, air, triethylene glycol, in, 213
Disodium hydrogen phosphate therapy in lead poisoning, 205
Dust, atmospheric, effect of saline aerosols on, 56
Dyspnœa of coal-miners, " neo-epinine " in, 100

E

Ear, changes in, due to atmospheric pressure changes, 53
Efficiency, industrial, as affected by food intake during rest periods, 215
Epileptic attacks from poisoning with trimethylenetrinitroamine (T4), 47
Ethylene chlorhydrin poisoning, 207
———— glycol (anti-freeze) intoxication, 207
Eye, lesions of, from radiant energy, 213

F

Ferrous sulphate poisoning, 205
Fluoroacetate poisoning, 207
Food intake during rest periods, effect of, on industrial efficiency, 215
Food-stuffs, colouring of, coal-tar dyes in, 160

G

Galena, health of workers exposed to, 212
" Gammexane " and mosquito control in Belgian Congo, 48
Glass-wool dermatitis, 57
Granuloma, cutaneous, from accidental contamination with beryllium phosphors, 101
Granulomatosis, diffuse pulmonary, following exposure to beryllium, 211
————, pulmonary, chronic, 100
Graphite pneumoconiosis, 56, 100

H

Hæmachromatosis, 206
Hæmoglobin, amount of, in relation to pulse rate and heart volume during work, 158
———— concentration and physical fitness, 210
Hair-waving, permanent, cold process; dermatological and clinical study, 102
Hand, dorsal burn of, treatment of, 58
Head injuries, 160
Hearing of airline pilots, 214

Heat, acclimatization to, effects of physiological reactions to cold on, 32
Hepatitis among American Occupation troops in Germany, 97
Hydroquinone, mono and di methyl ethers of, toxicity tests on, 49
Hyperthyroidism and chronic mercury poisoning, 47

I

Iron and steel industry, 215

K

Kaolin, effects of, on the lungs of rats, 101
Kerato-conjunctivitis, epidemic, in workers in metallurgical factories in the Paris region, 59
Ketene, air-borne, physiological response of animals exposed to, 96

L

Lead compounds, solubility of, in human pleural fluid and blood serum, 209
— paint, health hazards from, in shipyards, 51
— poisoning, disodium hydrogen phosphate therapy in, 206
— ———— in Moroccan lead mines, 48
— ———— — the pottery industry, 95
— ————, stippling in, and effect of splenectomy, 49
Leather industry, dermatological hazards in, 57
Lens and retina, occupational diseases of, 59
Luminizers, blood changes in, using radioactive material, 51

M

Malaria control in Trinidad, by DDT spraying, 48
Mercury poisoning and hyperthyroidism, 47
———— ———— from fingerprint photography, 95
Metallic poisoning, deficiency paiterns in, 205
Methacrylonitrile and acrylonitrile, comparative toxicity of, 50
Miners, anthracite coal, with pulmonary complaints, studies of respiratory gas exchange in, 211
————, bituminous coal, pulmonary function studies in, 208
Moroccan lead mines, lead poisoning in, 48
Mosquito control with " Gammexane " in Belgian Congo, 48
Mustard gas poisoning in man, 48
———— —, skin lesions caused by, treatment of, 58
Mycosis, pulmonary, a new, 53

N

Naphthalene poisoning, acute hæmolytic anæmia due to, 96
" Neo-epinine " in the dyspnœa of coal-miners, 100
Nose, human, penetration of air-borne particulates through, 209
Nurses, health of, in hospital, 159

O

Oil particles in the lung and bronchiogenic carcinoma, 212
Optic neuritis from cold permanent wave, 94
Orientation, nonvisual, during flight, effect of linear acceleration and deceleration on, 98
Oxygen consumption, influence of thiamine intake on, 53
———— transport, circulation and respiration at simulated altitudes of 16,000–18,000 feet, 52
Ozone, toxicity of, 207

P

Peptic ulcer in factory workers, 103
Petroleum products, poisoning with, in children, 206
Pilots, airline, hearing of, 214
Pneumoconiosis after exposure to sulphur dioxide fumes and dust from coke fires, 158
————————, bauxite-fume, morphology of, 55
———————— from diatomaceous earth in French Kieselguhr workings, 56
————————, graphite, 56, 100
———————— of coal miners, reaction to carbon dioxide in, 210
Pneumonitis, acute, in a beryllium-worker, 100
———————— and acute dermatitis in beryllium workers, 57
Poisoning, arsine, from scaling with acid, 48
———————— ———— in industry, 208
————————, alkyl mercury compound, 50, 95
————————, carbon disulfide, theory and pathology of, 51
———————— ———— monoxide, ophthalmoneurologic changes in, 208
————————, ethylene chlorhydrin, 207
————————, ferrous sulphate, 205
————————, fluoroacetate, 207
————————, lead, disodium hydrogen phosphate therapy in, 206
Poisoning, lead, in Moroccan lead mines, 48
———————— ————, in the pottery industry, 95
———————— ————, stippling in, and effect of splenectomy, 49
———————— ————, tungsten, vanadium, uranium, copper and copper-arsenic, effect of BAL on, 94
————————, mercury, and hyperthyroidism, 47
————————, metallic, deficiency patterns in, 205
————————; mustard gas, in man, 48
————————, naphthalene, 96
————————, thallium, case of, 49
————————, vanadium pentoxide, 54
———————— with petroleum products and benzol in children, 206
———————— ———— trimethylenetrinitroamine, epileptic attacks from, 47
Policemen, mercury poisoning in, from fingerprint photography, 95
Porphyrinuria in lead poisoning and hæmachromatosis, 206
Pottery industry, lead poisoning in, 95
Prickly heat, effect of water and salt intake on, 98
Procaine, contact dermatitis due to, 103
Protein requirements of heavy workers, 60
Pseudomonas pyocyanea, infection by, treated with dibromopropamidine, 103
Pulmonary function studies in bituminous coal miners, 208
Pulse rate, resting, blood pressure, and physical fitness, 210
Pyruvic acid, elimination of eschar in burns by, 97

R

Radiant energy, lesions of eye from, 213
Radiation work, health hazards in, 213
Radioactive material, luminizers using, blood changes in, 51
Respiratory gas exchange, studies of, in anthracite coal miners with pulmonary complaints, 211
Rhythm, significance of, in work in hot shops, 160
Rift Valley fever ; accidental infections among laboratory workers, 104
Roentgenology and radiology, protection of personnel engaged in, 97
Rubber industry, dusting compounds in, study of workers exposed to, 208

S

Scaling with acid, arsine poisoning from, 48
Seabather's eruption, 103
Seizures, head injuries and litigants, 160
" Shaver's disease," 55
Shipyards, health hazards in, from lead paint and zinc chromate paint, 51
Silica, solubility of, relation between, and capacity of mineral silicates to produce silicosis, 55
Silicosis, cardiovascular effects of, 158
————, " egg-shell " calcifications in, 99
————, from mineral silicates, and the solubility of silica, 55
————, mortality and survival rates in males with, 99
————, pulmonary hila in, tomographic studies of, 99
————, respiratory function in, study of, by use of bronchodynamic aerosols, 211
Sphaceloteca sorghi Line-Clinton, 53
Splenectomy, effect of, on stippling in lead poisoning, 49
Starch, modified, tissue reaction to, 54
Stippling in lead poisoning and effect of splenectomy, 49
Streptomycin, cutaneous changes caused by, in hospital workers, 58
Sweating, water and chloride distribution during, 52

T

Talc, study of workers exposed to, in the rubber industry, 208
————, tissue reaction to, 54
Thallium poisoning, case of, 49
Thiamine intake and physiological response, 53
Tissue reaction to talc and modified starch glove powder, comparison of, 54
Toxicity, acetone, experimental studies, 50
————, comparative, of methacrylonitrile and acrylonitrile, 50
———— tests on the mono and di methyl ethers of hydroquinone, 49
Triethylene glycol in air disinfection, 213, 215
———————— ———— vapour, bactericidal action of, in air, 215
Trimethylenetrinitroamine, poisoning with, epileptic attacks from, 47
Trinidad, malaria control in, by DDT spraying, 48
Tuberculosis in industry, 59

U

Underground trains, bacterial contamination of air in, 214

V

Vanadium pentoxide poisoning, 54

Z

Zinc chromate paint, health hazards from, in shipyards, 51
